**FEATURES**
- Liquid level switches that can detect almost any liquid type; oil or water based
- Choice of material; Polysulfone (standard) or Trogamid®
- Choice of threads

**BENEFITS**
- Low power
- Low cost
- Compact design

**TECHNICAL SPECIFICATIONS**

<td>Sensor termination</td>
<td>24AWG, 250mm PTFE wires, 8mm tinned</td>
</tr>
</tbody>
</table>

**NOTES**
- Above +85°C, Trogamid is suitable for use in water based liquids. Oil based liquids can cause deformation of the sensing tip and must be tested for compatibility.
- Before use check that the fluid in which you wish to use these devices is compatible either with Polysulfone or Trogamid®.
- Voltages applicable to output value stated.
d) Types 1, 2 and 3 can be sealed with washers and locknuts.
e) Type 6 should be sealed with Parker 3-905 type o-ring.
f) Type 7 should be sealed with PTFE tape.
g) When correctly sealed.
In order to suit any application, these sensors have been designed with various output circuit configurations.

**Digital Output High in Air**

- **Liquid Level Sensor**
- **Red**: Power supply (+Vs)
- **Green**: Input
- **Blue**: Output (Blank)

**Digital Output Low in Air**

- **Liquid Level Sensor**
- **Red**: Power supply (+Vs)
- **Green**: Input
- **Blue**: Output (Low)

⚠️ **CAUTION:** Take care when connecting loads.

The minimum load impedance should not exceed Vs/max output current.

**Note:** Shorting the output to Vs or 0V will result in irreparable damage to the sensor.

**ORDER INFORMATION**

Generate your specific part number using the convention shown opposite. Use only those letters and numbers that correspond to the sensor and output options you require — omit those you do not.

**Sensor mounted from inside vessel**

**Notes:**
- Type 3 and Type 5 sensors are mounted internally.
- Types 1, 2, 6 & 7 sensors are mounted externally.
- SH suffix applicable to Types 1, 2, 6 & 7 sensors only; omit from Type 3 and Type 5 sensor part numbers.
CAUTION
Do not exceed maximum ratings and ensure sensor(s) are operated in accordance with their requirements.
Carefully follow all wiring instructions. Incorrect wiring can cause permanent damage to the device.
We recommend using alcohol based cleaning agents. Do NOT use chlorinated solvents such as trichloroethane as these are likely to attack the sensor material.
Failure to comply with these instructions may result in product damage.

INFORMATION
As customer applications are outside of our control, the information provided is given without legal responsibility. Customers should test under their own conditions to ensure that the equipment is suitable for their intended application. Before use, check that the fluid in which you wish to use these devices is compatible with Polysulfone or Trogamid®.

General Note: We reserve the right to make changes to product specifications without notice or liability.
All information is subject to our own data and considered accurate at time of going to print.
